

# Drive shaft 3-part

# **Product information** | Technical data sheet

Jansen Steel Tubes and Mubea Precision Steel Tubes produce welded-drawn precision steel tubes made of high-tensile materials for three-part drive shafts.

Tubes for the 3-part drive shafts are welded to other components to form one unit. Consequently, there are stringent requirements to dimensional tolerance, roundness, end processing qualities and the tubes' welding characteristics. The trend of light-weight design is increasingly demanding high-tensile materials.

## Tube requirements

High strength values
(elongation at break, tensile strength)
High torsional strength and durability

Very good welding properties

High geometrical accuracy
(eccentricity, roundness)

Excellent surface condition

## Material properties

High torsional strength and fatigue strength

Homogeneous strength properties and ductility

Very good suitability for welding

Potential to reduce wall thickness

# Materials & dimensions

Application	Tube standard	Steel grades	Delivery condition	Dimensions range mm
Drive shaft (3-part)	✓ EN 10305-2	<ul> <li>✓ E355</li> <li>✓ 26MnB5</li> <li>✓ 34MnB5</li> <li>✓ 40MnCrB5</li> <li>★ 44MnB3</li> <li>★ 45MnB4</li> </ul>	<b>✓</b> +C	✓ OD 22 - 60 ✓ WT 2.5 - 6.5

### Structure

Homogeneous, fine-grain structure in weld seam and basic material

Minimised surface decarburisation of inner and outer surfaces (< 50 µm)

Excellent weld seam quality

### Geometry

Minimised fluctuations in wall thickness and inner/outer diameter

Minimised deviations in straightness

Minimised deviations in concentricity and axial run-out

Minimised eccentricity

Specific tube end processing: sawn/brushed; chamfered,

## Surface

Excellent surface condition

Minimised surface flaws
(adhesions, scratches, dents, etc.)

Minimised corrosion protection,
optionally specific corrosion protection

completely processed/chamfered

# Extract from achievable weight-savings
