

SUCCEED IN TRANSFORMATION

Mubea

Spring Loaded Balancing Disc

Innovation:

- › Spring element based axial fixation of the rotor sheets with integrated balancing capabilities for secure and easy assembly

Customer Benefit:

- › Easy assembly
- › Single part solution / Omission of glue, screws and securing elements like nuts and snap rings
- › Integrated tolerance equalization
- › Secure and definable axial fixation due to spring characteristic and press fit
- › Function integration of additive or subtractive balancing
- › Demountability

Status:

- › Proof of concept in real traction machine successfully conducted
- › Ready for SOP
