

SUSTAINABILITY

GREEN STEEL & ENERGY STRATEGY

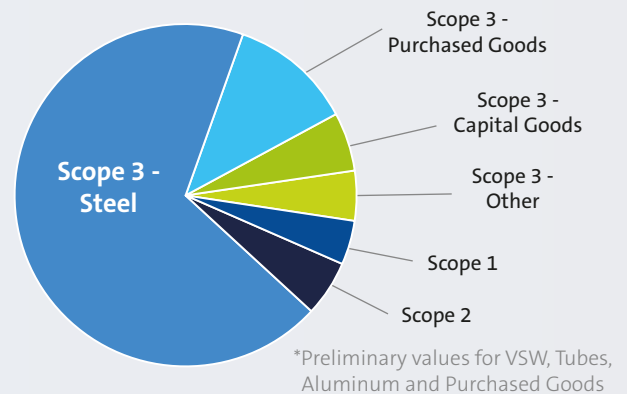

We commit in shaping a sustainable future, becoming **CLIMATE NEUTRAL BY 2035.**

Mubea CO2 emissions

- Only **9%** of our total emissions are **directly influenced by Mubea**
- Scope 2 emissions are eliminated by 2025 by switching electrical energy to green
- 91%** of our CO2 emissions are caused by **procurement**
- 69%** of our CO2 emissions are caused by **steel procurement**

The only way to achieve our targets is to transfer our steel procurement

CO2-Balance Mubea 2024 [t CO2]

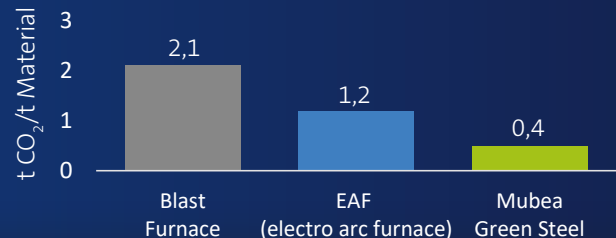

Mubea is shareholder of 1st real Green Steel plant worldwide

Mubea invested into true green steel plant Stegra (Sweden), in 2023

Secured 100 kto/a green Hot Briquetted Iron (HBI) capacity (i.e. 200 kto steel), SOP Q3 2027
