

Why Mubea?

Global:

Worldwide presence

Experience:

60 years of experience

World market leader:

40% market share and market and technology leader

Volume:

300 million disc springs per year

Customers:

2,000 customers from various industries

FINEBLANKING PARTS

COMPLEX AND HIGH-PRECISION
COMPONENTS FROM A SINGLE SOURCE

Mubea

DISC SPRINGS

MUBEA FINEBLANKING PARTS

Mubea is a world market leader in the automotive industry. Also in the field of fineblanking parts you can rely on many years of experience with high demands on quality!

With this know-how we offer you solutions for complex and high-precision geometries!

Different materials are used for our products:

- › Quenched and tempered steels
- › Case hardening steels
- › Stainless steels
- › Fine-grained steels

A large part of the raw material used comes from our own rolling mill. In addition, the tools are manufactured in-house.

FINEBLANKING

We are happy to help you on your way to the perfect fineblanked part with our experience & technologies:

- › Press forces from 1,600 kN to 10,000 kN
- › Processing of material thicknesses up to 10 mm

PROCESSING TO THE FINAL PRODUCT

For further processing of your component, we offer a wide range of machining services:

Inhouse:

- › Brush deburring / vibratory grinding
- › Press hardening, case hardening, induction hardening, as well as conventional quenching and tempering (martensitic, bainitic)
- › Various coatings
- › Optical component check
- › Assembly of components
- › Functional and dimensional testing

Processes of external partners:

- › Double face grinding
- › Plastic overmolding
