## Mubea

PRECISION STEEL TUBES

### Product information | Technical data sheet

Mubea Precision Steel Tubes produce welded and welded cold-drawn precision steel tubes for lifting columns and chromium-plated furniture applications.

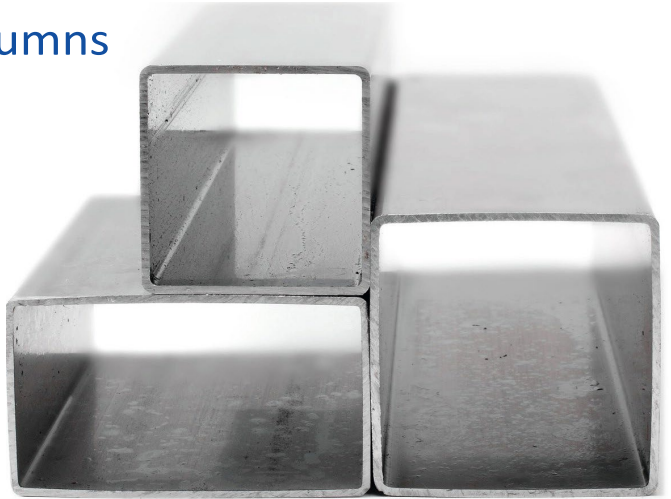

Excellent, tailor-made precision and profile steel tubes allow the complex linking of form and function. Mubea Precision Steel Tubes fulfil individual customer requirements, from tight tolerances and high-quality surfaces to tubes suitable

for chromium plating with homogeneous reflection characteristics. High dimensional and geometric accuracy as well as perfect surface smoothness meet the high aesthetic demands.

# Furniture applications / lifting columns

## Tube requirements

Individually selectable dimensions and shapes
High dimensional and shape accuracy, individually tailored shape and position tolerances
Customer-specific design of the corner radii
Consistently high surface quality
Minimised surface discontinuities (adhesions, scratches, dents etc.)
Perfect surface smoothness for optimum height adjustability
Excellent sliding properties

## Materials & Dimensions

Application	Tube standard	Steel grades	Delivery condition	Dimension range mm
Lifting columns	EN 10305-2	E235	+CR1	Round OD 30 - 90 mm WD 1.5 - 3.0 mm
	EN 10305-3	DD11	+CR2	
		DC01	+C	Different shapes (e.g. square / rectangular tubes) in standard dimensions up to 50 - 280 mm and on request.
		DC04	+LC
